

June 7, 2011

To all SCAS members.

From the Board of Directors.

This is to inform you that a long time dream of the SCAS family is beginning to be fulfilled. As of May 2011 we are the proud owners of a 1.25 acre lot way out west in the Redlands, on which to begin construction of a permanent observatory. Although the land is relatively clear there is much to be done. Beginning with the construction of a privacy fence as well as getting power from FPL. Once these 2 goals have been accomplished the property will be available for all members to set up scopes in a dark sky and secure environment at your leisure. We hope you the members are as excited as we the board about having our own observing site.
